Romania in the Disseminating Network of Innovative Solutions for Antibiotic Resistance Management

USAMV Project Manager: Assoc. prof. Stelian BĂRĂITĂREANU, DVM, PhD

USAMV Project Team: Prof. Livia VIDU, Ing, PhD; Prof. Doina DOINA, DVM, PhD;
Prof. Gina FÎNTÎNERU, Ing, PhD; Lect. Florin C. FURNARIS, DVM, PhD

Project summary

The project target is the best management solutions aimed to reduce the use of antibiotics and also the risk of antibiotic resistance, as a consequence of antibiotics use in Romanian livestock. These innovative solutions are identified and evaluated under the Horizon 2020 - DISARM - 817591 "Disseminating Innovative Solutions for Antibiotic Resistance Management" project, coordinated by the Institute for Agricultural and Fisheries Research (ILVO) Belgium, together with institutions from Belgium, the Netherlands, the United Kingdom, Denmark, France, Spain, Greece, Romania and Latvia.

A thematic network under the European Union's Horizon 2020 research and innovation programme: a cooperation between 15 partners from 9 countries, coordinated by the Flanders research institute for agriculture, fisheries and food in Belgium

DISARM consortium members to promote responsible use of antibiotics in livestock farming by actively identifying, sharing and disseminating best practices.

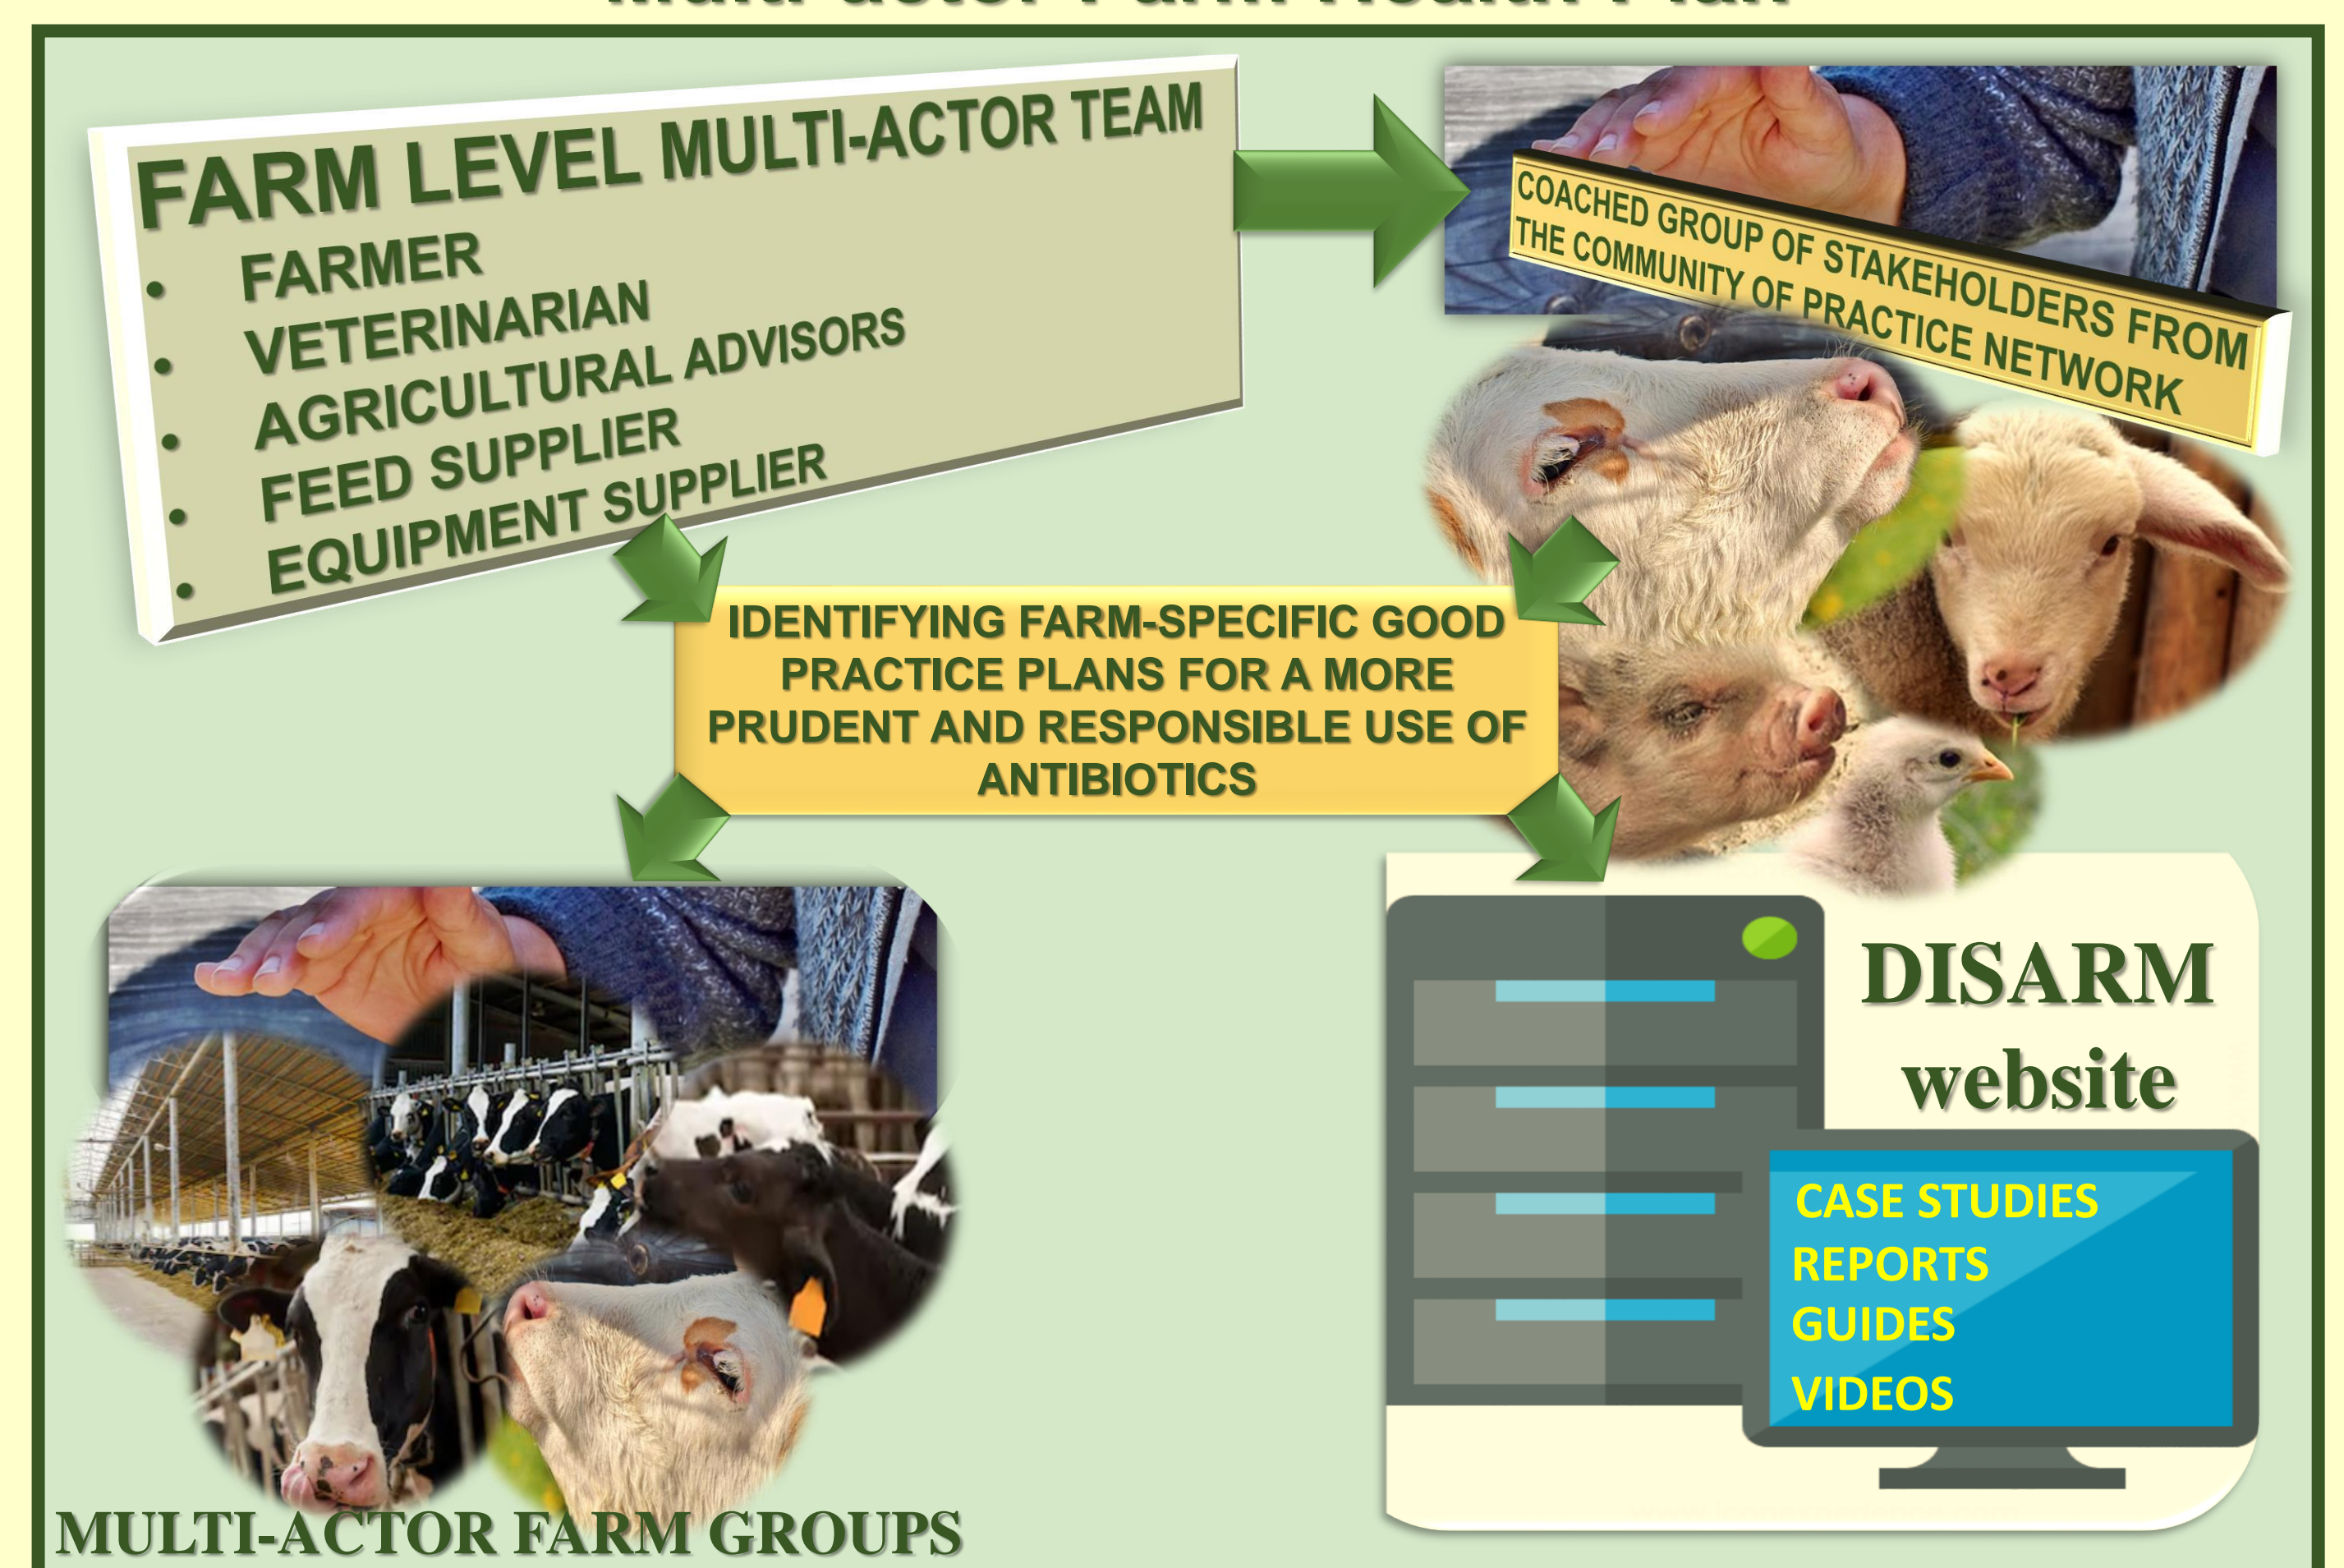

Europe wide collaboration

The Community of Practice Network

Multi-actor Farm Health Plan

DISARM has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 817591

DISARM (Disseminating Innovative Solutions for Antibiotic Resistance Management) is a collaboration between farmers, veterinarians, advisory services, academics and industry to promote prudent and responsible use of antibiotics in livestock production, in order to alleviate the threat of antibiotic resistance. Launched in January 2019, it will continue through December 2021 establishing a community of practice to disseminate effective practices and approaches. It will pilot and further unroll a multi-actor coaching method to stimulate farmers towards a more responsible use of antibiotics.
